✦ “Act as if what you do makes a difference. It does.”

↳ Hành động như thể những gì bạn làm tạo ra sự khác biệt. Vì nó thật sự có.

— William James

💡 Mỗi hành động, dù nhỏ bé, đều có tác động — đừng bao giờ coi thường những đóng góp của bản thân vì chúng tạo ra sự thay đổi thật sự.

Ít ổn định tài chính, mạng lưới an sinh xã hội nhỏ hơn: bên trong sự bùng nổ đầu tư thế hệ Z

🇬🇧 *Less financial stability, smaller social safety nets: inside the gen Z investing boom*

The Guardian [Đọc bài viết →](#)

A growing trend is emerging among Gen Z investors, characterized by a mix of caution and risk-taking. Despite facing uncertain job prospects and smaller social safety nets, young investors are increasingly turning to the financial markets. This shift is largely driven by the widespread adoption of mobile apps and AI-powered tools that make investing more accessible and user-friendly. As a result, Gen Z investors are entering the market earlier than previous generations, often with less financial stability. While this may seem counterintuitive, it reflects the changing economic landscape and the need for young people to take control of their financial futures. By combining caution with risk-taking, Gen Z investors are navigating the complexities of the market with a unique blend of optimism and pragmatism. This trend is likely to have significant implications for the financial industry and the way it serves younger investors.

Dưới một đám mây: sự oán giận ngày càng tăng đối với các trung tâm dữ liệu khổng lồ mọc lên khắp các thành phố của Úc

🇬🇧 *Under a cloud: the growing resentment against the massive datacentres sprouting across Australian cities*

The Guardian [Đọc bài viết →](#)

A growing concern is emerging in Australian cities as massive datacentres, often referred to as "AI factories," are being rapidly developed in residential areas. These large facilities, used for processing and storing vast amounts of data, are generating significant noise pollution and

have raised questions about their environmental impact. Residents are expressing frustration and resentment towards the hasty development of these datacentres, which are often built in close proximity to their homes. The lack of transparency surrounding the environmental effects of these datacentres has added to the community's concerns. As the number of datacentres continues to increase, residents are calling for more consideration and regulation in the development process. The issue highlights the need for a balance between the growth of the tech industry and the well-being of local communities.

Chúng tôi có thể sửa nó không? Chuyển từ phần cứng nhanh, vứt đi sang văn hóa DIY bền vững

 *Can we fix it? Shifting from fast, throwaway hardware to a sustainable DIY culture*

 The Guardian [Đọc bài viết →](#)

A growing movement is shifting the focus from fast, throwaway hardware to a more sustainable DIY culture. Experts are highlighting the environmental impact of hand and power tools, which can be surprisingly wasteful and polluting. In response, eco-friendly alternatives are emerging that still deliver the desired results. These alternatives often involve repurposing or upcycling existing materials, reducing electronic waste, and promoting a culture of repair and reuse. For instance, old tools can be refurbished or repurposed, and new tools can be designed with sustainability in mind. Additionally, open-source designs and community-driven projects are making it easier for individuals to create and share their own eco-friendly tools. By adopting a more sustainable approach to DIY culture, individuals can significantly reduce their environmental footprint while still achieving their goals. This shift towards a more eco-friendly DIY culture has the potential to make a significant impact on reducing waste and promoting sustainability.

Tin tức của Trump trong nháy mắt: Quân đội Hoa Kỳ sẽ được rút khỏi Đức khi mối thù của tổng thống với các đồng minh NATO tăng cường

 *Trump news at a glance: US troops to be pulled from Germany as president's feud with Nato allies intensifies*

 The Guardian [Đọc bài viết →](#)

The US Pentagon has announced plans to withdraw troops from Germany over the next six to 12 months. This move comes amid an intensifying feud between US President Donald Trump and NATO allies. The details of the withdrawal are yet to be disclosed, but it is expected to be completed within the specified timeframe. The decision marks a significant shift in US military presence in Europe, which has been a cornerstone of NATO's defense strategy. The withdrawal is likely to have far-reaching implications for the alliance and regional security. The exact reasons behind the decision are unclear, but it is believed to be part of a broader effort to re-evaluate US military commitments abroad. The move is set to be closely watched

by NATO officials and international observers, who will be monitoring the situation closely to assess its impact on global security dynamics.

Kế hoạch tư vấn tài chính miễn phí mới nhằm giúp người Anh tiết kiệm

 *New free financial advice plan aims to help Britons build savings*

 The Guardian [Đọc bài viết →](#)

The UK government has introduced a new initiative aimed at helping Britons build their savings. As part of this plan, certain banks and financial institutions will be able to offer free additional financial advice to their customers. This "targeted support" is designed to provide extra help with investments and pensions, enabling individuals to make more informed decisions about their financial futures. The specifics of the plan are not detailed in the provided information, but it is clear that the goal is to provide accessible and free financial guidance to those who need it. By partnering with banks and financial institutions, the government hopes to reach a wider audience and promote financial literacy among the general public. The plan's focus on investments and pensions suggests that it may be particularly beneficial for individuals approaching retirement or looking to grow their wealth over the long term.

'Chúng ta phải chế giễu sự điên rồ của trang web': diễn viên hài Tim Heidecker về sức hấp dẫn của việc trở thành ông chủ mới của Infowars

 *'We have to mock the site's insanity': comedian Tim Heidecker on the allure of becoming Infowars' new boss*

 The Guardian [Đọc bài viết →](#)

Comedian Tim Heidecker, creative director of The Onion, has spoken out about the company's plans to acquire Infowars, a conspiracy theory website founded by Alex Jones. Heidecker has stated that his intention is to parody the site, rather than take it seriously. In an interview, he expressed his excitement about the prospect of taking over Infowars, describing it as "insanity" that needs to be mocked. Heidecker's plan is to use the platform to satirize the site's content, which he believes is ripe for ridicule. The takeover is still pending court approval, but Heidecker is already envisioning his strategy to poke fun at Infowars' outlandish claims and conspiracy theories. Notably, Jones has reacted negatively to the news, indicating that he is not pleased with the idea of being parodied by The Onion.

Chính phủ liên bang bị cáo buộc đã bác bỏ đề xuất bảo vệ các loài và hệ sinh thái bị đe dọa của Úc

 *Federal government accused of watering down proposal to protect Australia's threatened species and ecosystems*

 The Guardian [Đọc bài viết →](#)

The Federal government has been accused of watering down a proposal aimed at protecting Australia's threatened species and ecosystems. The Wilderness Society claims that changes made to the national standards undermine the original intent of reversing the decline of plants, animals, and ecosystems. The proposed standards were intended to provide a framework for assessing and managing the impact of human activities on the environment. However, the Wilderness Society alleges that the revised proposal has been weakened, compromising its effectiveness in protecting Australia's unique biodiversity. The organization is concerned that the changes will allow for further degradation of the country's natural heritage, despite the government's stated commitment to conservation. The Wilderness Society is urging the government to reconsider the revised proposal and restore the original standards to ensure the long-term protection of Australia's threatened species and ecosystems.

Zambia hủy bỏ hội nghị thượng đỉnh về nhân quyền và công nghệ lớn nhất thế giới vài ngày trước khi bắt đầu

 *Zambia cancels world's largest human rights and tech summit days before start*

 The Guardian [Đọc bài viết →](#)

The Zambian government has unexpectedly canceled the world's largest human rights and tech summit, RightsCon 2026, just days before its scheduled start. The conference, which was set to take place in Lusaka, was blocked by the government citing that it did not align with the country's national values. RightsCon is an annual event that brings together experts, activists, and industry leaders to discuss the intersection of human rights and technology. The conference aims to promote digital rights, counter online harassment, and address the impact of technology on society. The sudden cancellation of the event has raised concerns among organizers and attendees, who had been looking forward to the conference. The reasons behind the government's decision to cancel the event remain unclear, and it is unclear what specific national values the conference was deemed to be in conflict with. The cancellation has sparked widespread criticism and disappointment among human rights advocates and tech industry professionals.

⚡ TIPS & TRICKS CHO DEV

⚡ Tạo mã code hoàn chỉnh với GitHub Copilot

GitHub Copilot là công cụ AI giúp bạn tạo mã code hoàn chỉnh dựa trên các đoạn code đã có. Hãy gõ mã code cơ bản, sau đó sử dụng lệnh `git copilot` hoặc nhấn tổ hợp phím `Ctrl + Space` để truy cập vào tính năng hoàn thiện mã code.

Ví dụ: gõ `function helloWorld()` sau đó nhấn `Ctrl + Space` để hoàn thiện mã code.

⚡ Tối ưu hóa code với ChatGPT

ChatGPT là AI chatbot giúp bạn tối ưu hóa code và đề xuất các sửa đổi dựa trên code đã có. Hãy gõ

`@chatgpt optimize <your_code>` để yêu cầu ChatGPT tối ưu hóa code của bạn.

Ví dụ: gõ `@chatgpt optimize function helloWorld()` để tối ưu hóa mã code.

📖 BÀI HỌC AI HÔM NAY CHO DEV

Tự động hóa với LLM (Large Language Model): Tối ưu hóa quy trình phát triển ứng dụng

Trong bối cảnh ngày càng nhiều ứng dụng được triển khai với tốc độ nhanh chóng, tự động hóa quy trình phát triển bằng LLM trở thành một nhu cầu thiết yếu để tăng cường hiệu suất và giảm thiểu thời gian phát triển. LLM có thể giúp các nhà phát triển tự động hóa các tác vụ như tạo mã, kiểm tra mã, và thậm chí tự động triển khai ứng dụng.

Ví dụ: Sử dụng LLM như Codex để tự động hóa việc tạo mã bằng cách cung cấp một mô tả về dự án và các yêu cầu chức năng. Codex có thể tạo ra mã nguồn dựa trên mô tả đó, giúp giảm thiểu thời gian phát triển và tăng cường hiệu suất.

```
import codex
```

Tạo mô tả về dự án

```
project_description = {  
    "name": "Dự án mới",  
    "requirements": ["Tạo một ứng dụng quản lý thông tin người dùng"]  
}
```

Sử dụng Codex để tạo mã

```
code = codex.create_code(project_description)  
  
print(code)
```

💡 Tip: Để tận dụng tối đa khả năng tự động hóa của LLM, bạn nên kết hợp nó với các công cụ phát triển khác như GitHub Copilot và các công cụ kiểm tra mã. Điều này sẽ giúp bạn tạo ra quy trình phát triển hiệu quả và tự động hóa tối đa.
